Do you have a sneaking suspicion that your spouse, child or employee is up to something?

Our Mobile Monitoring Software will give you the answers you are looking for! Our software is perfect for keeping track of your child's mobile and internet usage, monitoring your employees daily activities or finding out who your spouse stays in touch with. By secretly recording events that happen on the target phone, such as SMS messages, emails, web browsing and phone calls, you will always know where your target is and what he or she is up to. All this information is conveniently delivered straight to your web account!

Our ground-breaking software will help you unlock the truth and provide you with the answers you have been looking for.

✓ Keep track of your children's phone usage

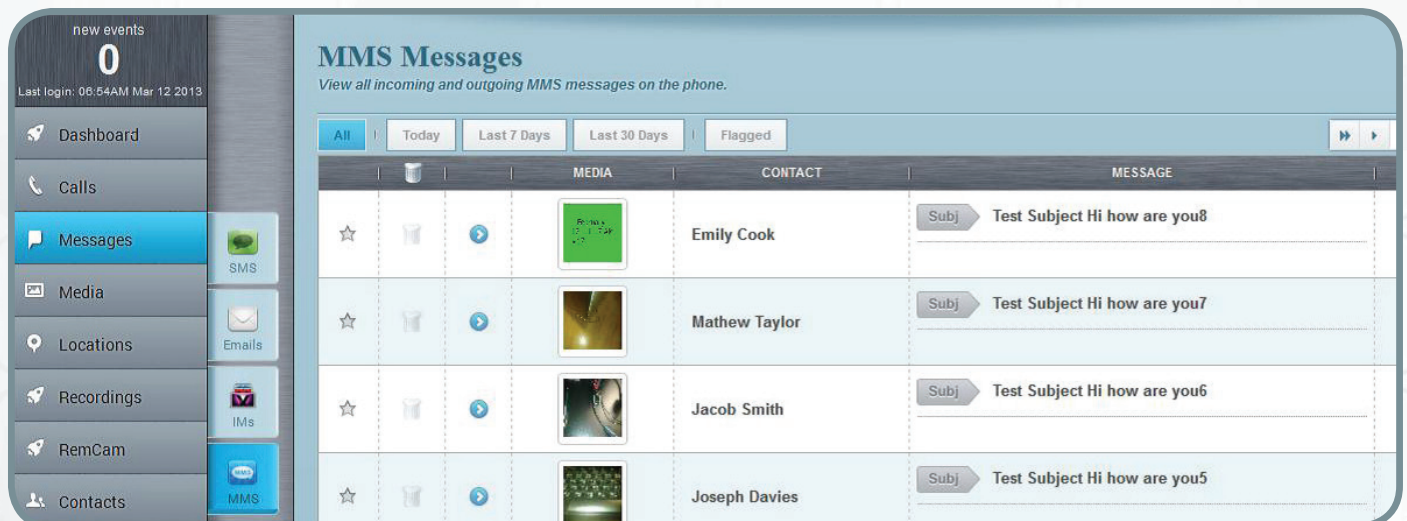

Monitoring your child's phone usage will help protecting them from internet predators, cyber bullying and help them avoid being involved in sending inappropriate images or texts. By monitoring their phone you can help your child avoid dangerous situations before they happen!

✓ Supervise the activities of your employees

Keep an eye on your employees to make sure they are using their phone for work related activities, and keep track of their locations - which is a great safety measure. Our software helps you keep a watchful eye on your employees, instead of worrying about their whereabouts and whether or not they are actually working or wasting time on Facebook!

✓ Monitor you Spouse's communications

Our software will let you closely monitor who your spouse stays in touch with, where they are and what they talk about. No one wants to find out that their spouse is going behind their back, but if you have a sneaking suspicion that something is going on, our software will empower you with the information and answers you need to take action.

The screenshot shows a web interface for tracking MMS messages. On the left is a sidebar with navigation options: Dashboard, Calls, Messages, Media, Locations, Recordings, RemCam, and Contacts. The main area is titled 'MMS Messages' and shows a list of messages. Each message row includes a star icon, a trash icon, a play icon, a thumbnail image, the contact name, and the message subject. The messages listed are:

	MEDIA	CONTACT	MESSAGE
☆		Emily Cook	Subj Test Subject Hi how are you8
☆		Mathew Taylor	Subj Test Subject Hi how are you7
☆		Jacob Smith	Subj Test Subject Hi how are you6
☆		Joseph Davies	Subj Test Subject Hi how are you5

Example of the MMS tracking dashboard.
